

Template for Project Overview, Clinical Study Grants (20 percent)

The grants are a targeted measure to integrate research into clinical practice and are designed to recruit clinicians to participate in ongoing clinical studies. The target group for the grants is healthcare personnel who wish to participate in research but have been minimally active in research after obtaining their doctorate. The measure aims to increase interest and competence in clinical studies and thus serve as a long-term recruitment measure for clinical research in the region.

Formatting Requirements:

- **The overview should be concise and in Norwegian, English, Swedish, or Danish.**
- **Maximum of 5 pages. The page format should be A4.**
- **Font: Equivalent to Calibri 11 pt, single line spacing, minimum 2 cm margins.**

Current Project(s)

The application must be linked to one or more ongoing research projects at the department where the applicant is employed. The projects must already be funded, and the grants should primarily be used for competence building for the applicant. List the current project(s) the applicant will contribute to. For each study, provide the following information:

- Project title
- Project leader (internal)
- Funding source
- Project period (funding period)
- Other study sites in the region (if applicable)
- Collaboration partners locally, regionally, nationally, and internationally

How Will the Applicant Contribute to the Project(s)?

Briefly describe the research activities the applicant will participate in during the grant period (e.g., patient inclusion, analyses, and publications).

Budget

The budget should be entered in the application form (eSøknad). Grants can be applied for up to 3 years. The rate follows the rate for postdoctoral grants and should be used for salary with social expenses. Operational funds cannot be applied for.
